

THE PARTY FOR PROGRESS

OUR HISTORY

The lizard people evolved due to instantaneous mutations after a meteor impact in the Amazon rainforest in the early 19th century. Believed by the local natives to be ancient deities, these mutated lizards began to be worshipped in much of Central and South America. They eventually moved up to North American civilization and settled the United States in the early 21st century. Upon arrival, the lizard people discovered that the U.S. politicians were corrupt and untrustworthy, and their policies did not reflect the needs of the American public. Thus, the lizard people founded the Lizard People Party in 2017 and will run for public office in all 50 states to iron out these issues and restore faith in the American political sphere.

OUR SYMBOL

Chameleons, as our friends from the rainforest, are a perfect symbol of the focus and goals of the Lizard People Party. It represents transparency, resourcefulness, and progress. One of the LPP's main goals is to remain open with the public about policies and decisions made on a state and federal level to keep all citizens informed. In addition, chameleons will change and adapt to their surroundings, similar to how the LPP will use the many resources that the government has to shape policy around the current issues and needs rather than shaping the public around the policy.

OUR VISION

The Lizard People Party wishes to place the power back into the hands of Americans while also promoting the overall success of the country and market.

TAXES

The LPP will reduce federal individual income taxes and raise firearm, corporate income, drug, and excise taxes. This will reduce the burden on American families while also providing the federal government another, reliable source of income.

GUN CONTROL

The LPP will lower the amount of citizens with access to guns who are not able to safely own them by increasing the rigor of background and mental health checks, but also banning fully-automatic rifles and implementing measures to regulate illegal modifications.

IMMIGRATION

The LPP will work to crack down on illegal immigration while promoting legal immigration by easing the immigration process and by ensuring that all immigrants are given equal opportunities to enter the country regardless of background. This will increase diversity and encourage the free market due to freer movement.

ENVIRONMENT

The LPP will work to meticulously protect the environment and invest in renewable resources. This includes reducing deforestation and fossil fuel supplies while increasing replanting and clean energy research measures.

FOREIGN AFFAIRS

The LPP will solve foreign issues and achieve peace through diplomacy. We believe that the domestic affairs of other nations are not the business of the U.S. and should be solved within the affected nations. In addition, the LPP will change the focus of the military and market to domestic to promote American business and exports, as well as internal safety.

AFFIRMATIVE ACTION

The LPP will create policies that will guarantee that educational and employment opportunities are available to every person, but ensure that chosen persons are those of greater skill rather than different race, gender, etc. of other candidates.
